Bruce Lee Lin

Full-Stack Developer · Seeking full-time roles from May 2027
(437) 988-4102 · bruce700982@gmail.com
brucelsprouts.com · github.com/brucelsprouts · linkedin.com/in/bruce-lin-6284b323b

EDUCATION

Western University — London, ON · 2023–Present
Bachelor of Science, Computer Science · Expected Graduation: 2027

PROJECTS

Deckira · Flashcard app for students — deckira.com
TypeScript · React · Tauri · React Native (Expo) · Supabase

- Co-developing a spaced-repetition flashcard app for students on web, desktop, and mobile.
- Own the front end on all three (FSRS scheduling, offline sync, media cards) and contribute to the Supabase back end.

Ladder · Job-application tracker — ladder.brucelsprouts.com/demo
Next.js · TypeScript · Supabase (Postgres) · Gmail API · Vitest · PM2

- Built a job tracker whose worker polls Greenhouse, Lever, Ashby, and SmartRecruiters and scores postings.
- Reads Gmail over OAuth (encrypted tokens) to update application statuses, with live Sankey stats and a Vitest suite.

Nocturne · Touch-typing trainer — nocturne.brucelsprouts.com
React · TypeScript · React Three Fiber · GLSL · Supabase · Oracle Cloud

- Built an adaptive typing trainer that scores each key, letter pair, and finger and drills the slowest pairs.
- Shipped end to end: a raymarched WebGL interface, with progress synced to self-hosted Supabase.

Tempo · Continuous-scroll calendar — github.com/brucelsprouts/tempo
Next.js · TypeScript · Supabase · Tailwind CSS

- Designed a calendar with no month pages: one virtualised, continuous scroll of week rows.
- Stored each recurring event as one RFC 5545 rule expanded at render time, not as a row per date.

EXPERIENCE

Lead Developer, Designer & Facilitator — Apr–Aug 2026
Toronto STEM Exploration Camp · tsecamp.ca

- Designed and built the camp website solo (React, Vite, Tailwind CSS, Vercel) for a free STEM camp for youth aged 8–13; phone-first, no backend, and registration filled all 30 spots.
- Designed the camp logo and visual identity, and taught hands-on STEM sessions on site during camp week.

Video Editor Intern — Mar 2024–Present
AMG · Independent, YouTube

- Edit client video across several concurrent projects in After Effects (motion graphics, compositing, transitions).
- Run a YouTube channel (2.4K subscribers) of edits and tutorials; one edit reached 880K views.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript · Python · Java · SQL · Rust · HTML / CSS
Frameworks	React · Next.js · React Native (Expo) · Tauri · Tailwind CSS · Three.js
Tools & Platforms	Git · Supabase (Postgres) · Node.js · Vercel · Oracle Cloud · Linux · Claude Code
Creative	After Effects · Photoshop · Blender
