

Bruce Lin

Computer Science Student & Full-Stack Developer

(437) 988-4102 · email@brucelsprouts.com · brucelsprouts.com · github.com/brucelsprouts · linkedin.com/in/bruce-lin-6284b323b

EDUCATION

Western University

London, ON · 2023–Present

Bachelor of Science, Computer Science · Expected Graduation: Spring 2027

TECHNICAL SKILLS

Languages	TypeScript · JavaScript · Python · Java · Rust · SQL · PHP · HTML · CSS
Frameworks	React · Next.js · React Native (Expo) · Tauri · Tailwind CSS · Three.js · GSAP
Tools & Platforms	Git · Supabase · Postgres · Node.js · Vercel · Oracle Cloud · Linux / Unix · Claude Code
Creative	After Effects · Photoshop · Blender

PROJECTS

Deckira

In development

Tauri · React · TypeScript · React Native (Expo) · Supabase

- Building a spaced-repetition flashcard app on one shared TypeScript core, shipped as a Tauri desktop client, an Expo React Native mobile app, and a React web app.
- Implemented FSRS review scheduling, offline-first local storage with cloud sync, media-rich cards, and Stripe subscription billing on a Supabase backend (Postgres, auth, edge functions).

Tempo

github.com/brucelsprouts/tempo

Next.js · TypeScript · Supabase · Tailwind CSS

- Built a continuous-scroll calendar that removes month pagination, virtualising one unbroken column of week rows so any date range stays smooth.
- Modelled recurring events as a single row with RFC 5545 rules and derived occurrences at render time, so an 80-year birthday costs one record instead of eighty.

Brucekit

github.com/brucelsprouts/brucekit

Tauri · Rust · React · TypeScript

- Built a keyboard-first Windows tray launcher that opens a searchable grid of utilities behind one global hotkey.
- Consolidated three earlier standalone apps (clipboard history, focus timer, network monitor) into toggleable modules alongside on-device OCR capture and a screen colour picker; runs fully local with no backend or telemetry.

Personal Portfolio

brucelsprouts.com ·

github.com/brucelsprouts/brucelsprouts.github.io

JavaScript · Three.js · GSAP · HTML · CSS

- Designed and built a cyber-tech portfolio from scratch with no CSS or JavaScript frameworks, integrating a Three.js particle system, GSAP scroll animations, URL deep-linking, and a low-performance accessibility mode.

EXPERIENCE

Lead Developer & Designer

Apr–Aug 2026

Toronto STEM Exploration Camp · tsecamp.ca

- Designed, built, and deployed the camp's public website as sole developer using React, Vite, Tailwind CSS, and Vercel.
- Created the camp logo and visual identity, then carried it through the full site design.

Freelance Video Editor

Mar 2024–Present

AMG

- Edit and deliver client video in After Effects and Premiere, producing motion graphics, compositing, and transitions to spec.
- Started as an on-site summer intern in 2024 and continued remotely, managing timelines across multiple concurrent projects.

English Tutor

2021–2023

Ignite Youth Club

- Tutored students in English comprehension and writing, adapting instruction to individual learning needs.
